Sameed Iqbal

Chicago, IL | Siqbal33@depaul.edu | linkedin.com/in/sameediqbal22

Summary

Information Systems graduate student and IT support specialist who keeps lab hardware and software running and builds working hardware–software systems (Arduino, Python, serial devices) for public exhibitions.

Education

DePaul University — Jarvis College of Computing and Digital Media Chicago, IL
M.S., Information Systems Expected April 2027

Karachi Institute of Economics and Technology (KIET) Karachi, Pakistan
B.S., Enterprise Resource Planning Aug 2019 – Sept 2023

Technical Skills

Programming: Python, SQL, JavaScript, C#, ASP.NET, HTML/CSS
Systems & IT: Windows/macOS support, system imaging and deployment, hardware troubleshooting, vendor RMA
Tools: Arduino, SharePoint, MongoDB, Excel, Unreal Engine, Google AI Studio, Figma

Experience

DePaul University — Jarvis College of Computing and Digital Media Chicago, IL
Technology Support Specialist Jan 2026 – Present

- Diagnose and fix hardware, OS, network, and software problems for faculty, staff, and students across CDM labs (Windows/macOS).
- Tested the 2026–27 Windows 11 lab image before rollout, checking 80+ applications, Windows and Office activation, device drivers, and network printing against a standard checklist.
- Image, migrate, and deploy lab machines with unattended software installs; handle system updates and cable management.
- Run RMA and repair cases with hardware vendors; escalate complex issues to senior IT staff.

Mozilla Data Collective Chicago, IL
Developer Ambassador Sept 2026 – Feb 2027

- Six-month program run with the RAISE Lab; pitch partnerships such as co-hosted workshops and hackathons.

Amreli Steels Limited Karachi, Pakistan
Information Technology Intern Jan 2023 – Mar 2023

- Moved the CRF documentation process onto SharePoint, replacing manual steps and cutting record errors.
- Built SharePoint web parts and form automation in C#, ASP.NET, and JavaScript.
- Worked with other departments to find where paperwork slowed down, then fixed those steps.

Karachi Institute of Economics and Technology (KIET) Karachi, Pakistan
Teaching Assistant Sept 2020 – Dec 2022

- Graded assessments, gave individual feedback, and ran lab sessions.

Projects

Civic Energy | *Technical Lead* 2026 – Present

- Testing an idea for showing Chicago building owners how much money their buildings lose to energy waste, and reaching out to first clients; awarded $2,000 by DePaul's Coleman Entrepreneurship Center.

Cost of a Click 2.0: The Environment Remembers | *Design IMPACT Grant, DePaul University* Summer 2026

- Led a four-person team expanding the original installation with a projected U.S. data center map, a thermal receipt printer, and a visitor question wall.
- Wrote the control software: Python drives the thermal printer over USB (python-escpos) and sends serial commands to an Arduino UNO R4 that runs the pump through a relay.
- Exhibited at Science Works, Griffin Museum of Science and Industry, Chicago (Oct 2026).

Cost of a Click | *IMPACT Summer Grant, DePaul University (with Code Your Dreams)* Summer 2025

- Built an installation that pumps water into a tank each time someone sends an AI prompt, connecting an Arduino, a submersible pump, and a live Python pipeline.
- Exhibited at Digital Inclusion Week 2025; a video of the piece reached 1M+ views, and its 5,514 comments became data for a CHI 2027 submission.

Leadership and Communities

DePaul Information Systems Student Organization (DISSO) | *Treasurer* Mar 2026 – Present

DePaul ISACA Student Group | *Treasurer* Nov 2026 – Present

Agentic Computing Across Disciplines | *Scholarship Learning Community, DePaul* 2026 – 2027

- Student member among faculty from five colleges, testing AI agents on research, creative practice, and teaching.

Global Creative Collaboration Lab | *Scholarship Learning Community, DePaul* 2026 – 2027

- Year-long lab on how language, power, and AI tools shape authorship in global creative collaboration.
